---	---	--

Welcome to the Energy Storage Summit Central Eastern Europe 2023

With the energy storage industry facing unprecedented growth across the globe, we are excited to launch our inaugural Energy Storage Summit Central Eastern Europe in Warsaw, Poland. We will be highlighting the opportunities, challenges and lessons learnt across various countries as the region readies itself for energy storage.

In countries across the region, the government has set ambitious renewable targets to help further the deployment of renewable energy and facilitate the move away from coal, and storage is predicted to start playing a more prominent role in the future, particularly in helping stabilise the grid. Poland's new energy strategy envisages 74% of energy production coming from zero-emission sources, including renewables. It predicts 88GW of renewable energy capacity by 2040. The Summit will look at opportunities in Poland, Lithuania and the Baltics, Romania, Bulgaria, Hungary, Ukraine, Austria, Croatia and Serbia.

Energy Storage Summit Central Eastern Europe will explore themes including investment opportunities for storage, business models, the growing regulatory support from governments, appetite from international vs. local developers and investors, how storage can support the grid, the development of ancillary services and best practice sessions.

If your goal is to meet other industry professionals and create valuable business partnerships to better understand the region, then the Energy Storage Summit Central Eastern Europe is the right place for you. We provide the perfect platform to make high-level connections and fuel enriching and beneficial conversations in a relaxed yet professional environment. Our networking opportunities have been described as second to none by industry professionals.

Join us in September to meet with investors, developers, utilities, network operators, technology providers, EPCs, consultants, law firms and more to make sure you are a part of the conversation as the region prepares for storage to take off.

Lucy Jacobson-Durham

Senior Conference Portfolio Manager

✉ lucy@solarmedia.co.uk

Our mission

To inspire change and create the knowledge and networks that will accelerate a decentralised, intelligent and sustainable energy market.

Our approach

Energy Storage Summit is far more than just another storage event – our unique proposition is that we are obsessed with delivering unique insights creating dialogue and partnerships. Your customers attend this summit to better understand the technology disrupting the market, build strong partnerships with new and existing customers and to seek help with making the right investment decisions.

As Energy Storage evolves at pace and we see more projects in the pipeline, only the most innovative players will succeed; now is the time to invest in marketing and business development that puts your unique proposition and brand at the forefront of decision makers minds.

Our commitment

To our commercial partners, we are committed to delivering ROI and optimising your time and budget; whether you want to fuel a sales team with new leads, heighten your brand or launch new products, no one is better placed to help than our team. Thank you for taking the time to discuss our offering and we look forward to taking this exciting journey with you.

Key Themes for 2023

The Energy Storage Summit Central Eastern Europe will cover all the most prominent themes and conversations associated with driving the industry forward. You can expect to meet all the key developers, investors, lenders, networks and utilities operating in the region, along with other market participants from technology, advisory and solutions businesses.

DAY 1: 26 September 2023

08:00-09:00	Registration & Refreshments
09:00 -09:15	Opening Presentation Keynote Address
09:15-10:00	<p><u>Keynote Panel One</u> Keynote Panel: What is Holding the Central Eastern European Region Back from Deploying More Energy Storage?</p> <p>There is plenty of promise for storage in the CEE region, however much is still unclear for those involved in the market. This panel will highlight policy issues which need to be addressed in order to help the market pick up pace.</p> <ul style="list-style-type: none">• The bigger picture – what is the critical timeline for ancillary service reforms?• What are the different regulatory hurdles faced by countries in the region?• What capacity targets are in place specifically across the region?• How can the PICASSO project help establish, enhance and integrate European aFRR markets and what is the roadmap for this?• How can the region make the shift to a wide-spread dependency on energy storage in relation to increasing system flexibility, now that gas is off the table?
10:00-10:20	<u>Presentation</u> Reserved for Host Sponsor
10:20-11:00	Morning Networking Break
11:00-11:40	<p><u>Keynote Panel Two</u> Keynote Panel: Understanding Different Business Cases for Energy Storage in the CEE Region</p> <ul style="list-style-type: none">• Understanding the different markets and their size, interconnectors, links with neighbouring markets, investment potential and current RE mix is crucial to building your principal business case• How can you create a sustainable business model for energy storage in regional markets, such as Poland, Romania, Hungary, Lithuania and Ukraine?• Is it better to combine storage with solar assets and make use of cable pooling, or to make a case for a standalone asset?• How does the evaluation differ for different players based on the investment being: co-location with PV/wind assets, standalone and storage at transmission or grid-level, such as grid booster battery storage projects? <p>Anna Chmielewska, Associate Director, Senior Banker, European Bank for Reconstruction and Development Filip Ostrowski, Vice President, Grupa TAURON</p>
11:40-12:00	<p><u>Presentation</u> What Do We Mean by Revenue Stacking for Energy Storage?</p> <p>Revenue stacking is a common-place term in the storage world, and it's clear that no market will be able to progress without it, but what do we actually mean by revenue stacking? This session will help guide you on what to expect and what to know before embarking on your project.</p>

DAY 1: 26 September 2023

12:00-12:40

Panel Discussion What are the Various Income Streams Which Make a Battery Storage Project Attractive?

This session will delve into how a combination of different revenue streams and revenue stacking can make energy storage projects so attractive for developers, investors and utilities. We will look at:

- What further revenue streams can come from the capacity market in Poland and how will an ancillary services market complement this?
- Using arbitrage and other services to enhance income – understanding loss of load probability
- What types of durations will help maximise capacity market income?
- Fast frequency services
- Other balancing services

Katherine Vinnicombe, Head of Corporate Development, **Eelpower**

12:40-14:00

Lunch Break and Networking

14:00-14:40

Panel Discussion The Role of the Recovery and Resilience Fund for Emerging Markets in CEE

- What is the role of EU funding in CEE markets and how can this open doors for countries in the region?
- Technology choices and their role in making projects more bankable
- Critical movement in Bulgaria, Romania, Hungary, Greece and Baltics all using this funding mechanism

14:40-15:20

Panel Discussion Energy Storage in the Baltics

What is the outlook for the Baltic countries, and how can their connections with neighbouring countries be leveraged when it comes to energy storage?

15:20-16:00

Panel Discussion Energy Storage in Ukraine

This panel will look at the demand for storage in Ukraine, and how to seize opportunities in the market.

- What are the main challenges around procuring energy storage in Ukraine?
- The impact of the lack of long-term contracts for storage and how these will make projects more bankable
- Ideas for cross-border ancillary services
- Development of energy storage projects in Ukraine

Moderated By: **Maksym Sysoiev**, Partner, **Dentons LLP**

Vadym Utkin, Energy Storage Lead, **DTEK**

16:00-16:20

Afternoon Networking Break

16:20-16:40

Manufacturing 'Green' Batteries: Energy Storage as Key for Security of Supply

Wilhelm Löwenhielm, Director ESS Business Area, **Northvolt**

DAY 1: 26 September 2023

16:40-17:20

Panel Discussion Keynote Panel: Betting Big on Ancillary Services to Build your Business Case

With the ongoing changes to energy legislation, it is likely that from 2025 we will see ancillary services being much more developed and able to participate in revenue income for batteries.

- How the development of these services will increase investor confidence and appetite for storage projects
- What exactly do investors need to know?
- What learnings can be taken from other markets to help players be as prepared as possible for when this happens?

Maayan As, Director of Energy Storage, **Nofar Energy**

Jakub Küpcü, Investment Manager Renewables & Storage, **CLARITAS Investments**

Kilian Leykam, Director, Investment Management Battery Storage, **Aquila Capital**

17:20-19:00

Close of Conference and Networking Drinks

DAY 2: 27 September 2023

08:30-09:00	Morning Refreshments & Networking
09:00-09:10	Welcome Address
09:10-09:50	<p><u>Keynote Panel One</u> Keynote Panel: The Urgency of Implementing Storage to Support Renewables Expansion</p> <p>It is key to understand how energy storage can provide balancing services, as well as ensuring system safety, stability and security for countries across the region.</p> <ul style="list-style-type: none">• The relationship between renewables, storage capacity and energy prices in day ahead and intraday markets• The benefits of utilising energy storage at transmission and distribution level, and how it can balance the grid• How energy storage will provide crucial flexibility benefits to electricity systems and free up capacity• Highlighting how current processes to obtain grid connections can be re-developed in order to create a beneficial environment for storage projects• Is cable pooling the answer to quicker grid connections and will this work for storage in the future? <p>Catalin Chimere, Manager, Energy Efficiency and New Technologies, CNTEE Transelectrica SA Audrius Baranauskas, Director of Innovation, Litgrid Tomasz Rodziewicz, Innovation & New Technologies Manager, TAURON Dystribucja</p>
09:50-10:10	<u>Presentation</u> Reserved for Sponsor
10:10-10:50	<p><u>Keynote Panel Two</u> Keynote Panel: Best Practice Developer Session – Where are the Big Bottlenecks?</p> <p>One of the single biggest bottlenecks is obtaining grid codes for BESS connections, a perpetual problem across the renewables industry. This panel will go into more detail on:</p> <ul style="list-style-type: none">• What are developers doing to overcome crucial grid connection issues?• What are grid operators doing to help alleviate the problems and develop grid infrastructure?• When might an Environmental Impact Assessment be necessary for projects and how to approach this• Understanding and highlighting other incidences which may impact the speed of development for projects in different countries <p><u>Moderated By:</u> Filip Sytko, Head of Global Business Development, Green Genius Piotr Czembor, Managing Director, Hynfra Energy Storage Adam Zalewski, Business Development Director, Griffin Energy Ewelina Szulc, Country Manager, Poland, Greenenergy Renovables</p>
10:50-11:30	Morning Networking Break

DAY 2: 27 September 2023

11:30-12:10

Panel Discussion How Can Regional Associations Help Support the Cause?

Péter Kaderják, Managing Director, **Hungarian Battery Alliance**

Barbara Adamska, President, **Polish Energy Storage Association**

Mariyana Yaneva, Policy Director, Association for Production, **Storage and Trading of Electricity (APSTE)**

12:10-12:50

Panel Discussion Financing Energy Storage Projects: All You Need to Know

- How the approach to financing energy storage differs from other renewable technologies in the region
- What is the ratio of debt vs. equity in the current market and what do future predictions look like?
- The difference between financing standalone vs hybrid projects
- Security of contracted revenues ahead of deploying projects
- M&A activity in the region – is now the right time to acquire early-stage projects?
- Learnings from financing projects in Western Europe

Moderated By: **Piotr Biernacki**, Head of Structured & Project Finance Department, **DNB Bank Polska**

David Scribner, Partner, **Cameron Barney**

Ewelina Walisiak, Managing Director, Global Debt Financing, **Santander Bank Polska**

Juan Carlos Badillo, Managing Partner, **AtZ Investment Partners**

12:50-13:50

Lunch and Networking

13:50-14:10

Presentation Why Early Detection (via Li-ion Tamer) is the Optimum Fire Safety Technology to Help Prevent Thermal Runaway

Some estimates indicate that the Central & Eastern European region could be the largest manufacturer of Lithium Ion batteries in Europe by the end of the decade. Without appropriate safety measures in place, though, Li-ion batteries may pose a serious fire hazard, which is often a consequence of thermal runaway.

This presentation examines why off-gas early detection (via Li-ion Tamer) is the optimum fire safety technology to help prevent thermal runaway in BESSs. We explain why neither existing fire safety standards and regulations nor traditional fire detection and suppression technology are fit for purpose.

Justin McNamara, Business Development Manager, EMEA, **Honeywell Advanced Detection**

DAY 2: 27 September 2023

14:10-14:50

Panel Discussion Operational Best Practice, Advice and Concerns

- Minimising risk: safety & reliability for projects
- What kind of software systems are needed?
- Effective asset management and making the most of your asset
- How to manage and extend asset life with advanced analytics
- How do you get better at forecasting, modelling and performance for operational assets?

14:50-15:10

Presentation Lessons Learned from Energy Storage Demonstrations in Poland: A DSO Perspective

- Polish ESS demonstrators integrated with distribution system grid
- Tests of energy storage units connected to the low voltage grid
- Potential added value of ESS in cooperation between local energy clusters and DSOs
- Potential profits and formal limits from DSO perspective

Tomasz Rodziewicz, Innovation & New Technologies Manager, **TAURON Dystrybucja**

15:10-15:50

Panel Discussion Energy Storage in the Balkans

What are the nuances of deploying storage in the Balkans, with a particular focus on Bulgaria, Romania and Croatia.

- How will the European Commission funding for 103million euros help drive energy storage build-out in Romania, and what do the timelines look like?
- What is the outlook for more clearly defined flexibility and capacity markets in countries like Romania and Bulgaria?
- How will recent changes to the law for renewables in Bulgaria help bolster energy storage growth?

Moderated By: Yuri Katanov, Board Member & Executive Director, **Renalfa**

Severin Vartigov, Country Manager, Bulgaria, **Enery Energy**

Varinia Radu, Partner, Head of Energy and Projects - Romania, **CMS**

Mariyana Yaneva, Policy Director, Association for Production, **Storage and Trading of Electricity (APSTE)**

15:50-16:30

Panel Discussion Energy Storage in Hungary

What are the opportunities for energy storage deployment in Hungary?

- How energy storage can help alleviate grid issues and achieve the 12GW renewable energy target
- How important are local developers and local capital for this goal?
- What is the biggest challenge for deploying more energy storage as it stands?

Tamás Pazsiczky, Director, Head of Energy & Resources, **Deloitte Hungary**

Péter Kaderják, Managing Director, **Hungarian Battery Alliance**

16:30-16:45

Closing Remarks & Close of Conference

Sponsorship Benefits

“ Attend to be aware of trends and growth within the Energy Storage industry in EU.
Brian Knowles, Pexapark

We are committed to delivering ROI and optimising your time and budget; whether you want to fuel a sales team with new leads, heighten your brand or launch new services, no one is better placed to help than our team. Contact Paul Collinson ▶

Lead Generation

Make sure you make the best use of your time, and develop new business opportunities with guaranteed 1-2-1 meetings on-site in Warsaw

Shorten Sales Cycles

Accelerate decisions by accessing qualified decision makers responsible for Energy Storage deployment across the Central & Eastern Europe

Thought Leadership

Present a case study, ensuring the market is fully conscious of the unique benefits of your solutions and advantages of partnering or investing in you

Innovation & Leadership

Join a panel and strengthen your commitment to driving energy storage deployment and position yourself as a key enabler

Relationship Building

Network and have fun with attendees, cementing your position as a leading partner of choice when implementing energy storage projects

Brand Recognition

Amplify your brand around the event and ensure you are front of mind with qualified decision makers and industry stakeholders

“ A great networking opportunity and incredibly informative and thought provoking sessions. **Brad Whipps, Rolls-Royce Solutions UK Ltd**

“ A professional and influential energy storage event in the UK.
Emma Geieregger, Samsung SDI Battery Systems GmbH
