Welcome to The UK Solar Summit 2024

The unmissable UK solar event of the year - now bigger than ever!

The UK solar market is undeniably gaining momentum, and we are now at a tipping point; 14.4GW has been installed and a deployment pipeline of over 24GW (as of 2023). Yet issues still arise when securing land space, knowledge and skills gaps, environmental, social and governance considerations across the supply chain, and establishing grid connections.

If the UK is to spearhead efforts to net-zero and achieve the amount of solar required to meet the 2035 target (up to 70GW installed PV), then streamlining, communication, and collaboration are absolutely essential!

UK Solar Summit 2024 will look at the role solar currently plays in the energy mix, how this will change over the coming years and how this aligns with net-zero and other government targets. We will break down all these challenges and help build up solutions through discursive panels, motivational keynotes and case studies, with newly added interactive sessions to get you moving and meeting your peers, making the connections you need to boost your business.

The Summit has helped businesses and individuals identify the market drivers and dynamics that will provide opportunities over the coming years. Join us at the UK Solar Summit 2024 for your annual update on all things solar in the UK and find out how your business can benefit from the opportunities available. You'll leave 2024's UK Solar Summit feeling informed, inspired and ready to take the UK forward in its' solar power journey.

Our mission

To inspire change and create the knowledge and networks that will accelerate a decentralised, intelligent and sustainable energy market.

Our approach

UK Solar Summit is far more than just another Solar event – our unique proposition is that we are obsessed with delivering unique insights creating dialogue and partnerships. Your customers attend this Summit to find capital for solar projects, better understand the technology roadmap, build strong partnerships and to seek help with making the right deployment decisions across the UK.

As the UK solar industry evolves at pace and we see more projects in the pipeline, the market has never been more competitive. As we see utility-scale solar & rooftop opportunities explode in 2024, only the most innovative players will succeed; now is the time to invest in marketing and business development that puts your unique proposition and brand at the forefront of decision makers minds.

Our commitment

To our commercial partners, we are committed to delivering ROI and optimising your time and budget; whether you want to fuel a sales team with new leads, heighten your brand or launch new products, no one is better placed to help than our team.

Thank you for taking the time to discuss our offering and we look forward to taking this exciting journey with you.

Who Will You Meet?

“ The UK Solar Summit is a great chance to start discussions with industry leaders and find out about the most innovative and exciting inventions and movements within the solar industry.
